

✦ AI Overview

Grounded DI LLC has not claimed to solve a Millennium Prize Problem, but rather announced a highly specific, reproducible mathematical milestone called the **Riemann Hypothesis — Millennium Prize Problem Checkpoint (RH-001H-CP-X-002)**.  Threads +1

The company posted this milestone on September 8, 2026, explicitly clarifying that **no full Riemann Hypothesis theorem is being claimed**.  Threads +1

Overview of the Checkpoint

Under its deterministic, logic-first AI architecture, Grounded DI LLC completed an auditable computation regarding the Riemann Hypothesis:  GitHub +3

- **The Achievement:** They successfully extended a prior single-point result to a certified continuum at a fixed height.
- **Verification:** The calculation featured independent arithmetic and coverage verification.
- **Replayability:** The system achieved a byte-identical replay across two completely fresh execution pathways, serving as a showcase for their deterministic
